Our technology will increase the performance of your sales team

Managers receive trustworthy, real-time data with which to make tactical informed decisions.

Artificial Intelligence

ForceManager incorporates voice-activated, AI technology to transform how reps communicate with their CRM.

Geolocation

Contextual information based on a rep's location shows nearby opportunities, accounts and optimum routes between visits.

Sales Activity

Real-time data automatically recorded and updated to the system; calls, emails, visit details, notes etc.

Integration

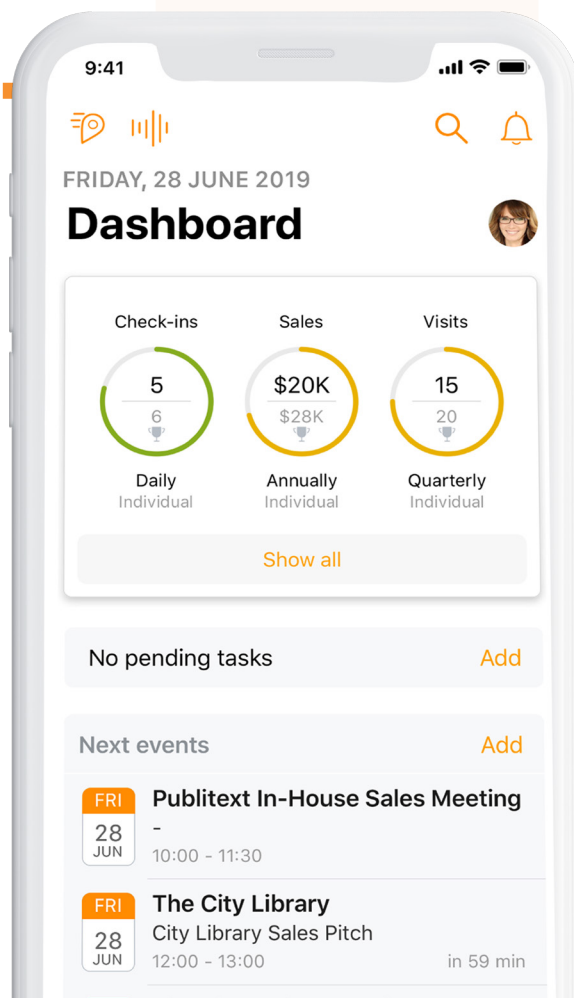

A completely customizable sales system which can be integrated with other CRM, ERP and marketing software tools.

Documents

Immediate access to all sales collateral such as PowerPoints, pdf. company brochures and product catalogues.

Inverse Reporting

Register sales visits in less than 10 seconds with a hassle-free, easy-to-use mobile CRM application.

Add-Ons

Sales Campaigns

Launch new campaigns in a matter of seconds around specific clients or account segments.

NewsManager

The sales communication tool that allows you to see who has (and hasn't) read your important correspondence.

GoalManager

Set specific, customizable objectives for your sales team in order to help reach your goals.

SignatureManager

Facilitate your team's ability to get deals across the line with our legally binding e-signature software.

What our clients say

Tom Ellis
Managing Director of
JT Ellis & Co

"The mobility for operating out in the field was really important to us as beforehand there was a bit of a chasm; what happened outside of the business on the road tended to remain that way,"

Adolfo Masagué
Sales Director at
Das Insurance

"Thanks to the implementation of ForceManager, we have increased prospecting visits by 20% and the previous reporting time of 2 hours per week has been drastically reduced. All this has led to an increase of between 25% and 30% in the conversion of new customers."

Albert Freixa
Marketing Coordinator at
Asics Middle East

"Thanks to ForceManager, not only have we been able to hit our sales targets but the job satisfaction of our Tech Reps has increase, noted by the user adoption of the application.

In addition, we are working more efficiently, spending less time reporting and able to divert our attention towards more sales-driving activities".
